

## **Experienced Stud and Reproduction Vet Required**

B & W Equine Vets are looking for an experienced vet to join their stud team at the Willesley Clinic, near Tetbury, Gloucestershire.

The Willesley clinic offers stallion collection facilities, reproduction laboratory, foal endoscope and frozen semen store alongside their on-site stud. This is supplemented by services available at the main B & W Equine hospital in Breadstone, Gloucestershire, which are run by diplomates in medicine, surgery and imaging and include two surgical suites, intensive care unit, MRI, CT and Gamma scintigraphy.

The caseload will consist of:

- Sports horse breeding with fresh, chilled and frozen semen
- Thoroughbred studwork
- Embryo transfer with an expanding herd of B & W recipient mares
- Stallion assessment, collection and semen evaluation for shipping commercially and as part of fertility examinations for both resident and walk-in stallions

The role also includes regular non-stud ambulatory duties, both routine and for emergencies as part of the wider Willesley team.

The successful candidate would preferably hold a relevant postgraduate qualification. They must be a team player with exceptional client care and excellent communication skills. Out of hours, including weekends, are covered on a 1:4 rota basis.

Package including a company car, CPD allowance, pension, holiday allowance, and bonus scheme. Salary is dependent on experience.

To apply send CV and covering letter including position applied for and how your skills and experience would add value to us at [vacancies@bwequinevets.co.uk](mailto:vacancies@bwequinevets.co.uk)

Closing date for applications: 31st of October 2017.
